***** is pleased to announce the acquisition of a tool to assist in the diagnosis of locomotor asymmetries: EQUISYM®. This unique and innovative system will provide new elements for analysing the locomotor system. It will also strengthen and refine the longitudinal monitoring of horses.

For more information, visit the product page: <https://vet.arioneo.com/en/equisym-locomotion-care-en/>

Developed in collaboration with researchers and clinicians from the Normandy Equine Research Centre (CIRALE) at the National Veterinary School of Alfort (EnvA), which is internationally renowned in the field of locomotor pathology and biomechanics, EQUISYM is the result of more than 20 years of research by EnvA teams.

Template EQUISYM® – Email

***** is pleased to present EQUISYM®, a tool to **assist in the diagnosis of locomotor asymmetries**. This unique and innovative system will provide **new elements for analysing** the locomotor system. It will also enhance and refine the longitudinal monitoring of horses.

A cutting-edge, reliable and accurate tool, using the latest motion sensor **technology**. Combined with your **vet's expertise**, EQUISYM® helps you to better understand your horse:

- Intense effort: is the horse's locomotion impaired?
- Poor performance: could a change in locomotion explain this?
- Discomfort: is it linked to discomfort?
- Complementary care: which protocol is best suited to its needs?
- Injury: how can it be detected before it becomes established?
- Lameness: how is it progressing?

Contact us to schedule your first locomotor assessment!

Vous pouvez aussi découvrir un exemple concret d'utilisation, avec la quantification des effets d'un traitement réalisé sur un jeune cheval de 8 ans : https://4217512.fs1.hubspotusercontent-na1.net/hubfs/4217512/EN_Suivi%20longitudinal%20apre%CC%80s%20traitement.pdf
