

EQUISYM

locomotion care

Your veterinarian is equipped with EQUISYM®

Request a locomotor assessment now!

Support tool for the diagnosis of equine locomotor asymmetries

Why quantifying my horse's locomotion?

Intense effort: *Is the horse's movement impaired?*

Underperformance: *can a change in locomotion explain it?*

Bad feeling: *is it related to discomfort?*

Complementary care: *which protocol is best suited to its needs?*

Lesion: *how to detect it before it develops?*

Lameness: *how does it evolve?*
